Announcing CCEI Research Support Opportunity! May 6, 2013

CCEI has received a Technology grant to offer a limited number of 2-year software licenses to graduate and undergraduate student researchers. The software, ATLAS.ti, is designed to help researchers analyze interview transcripts, observation transcripts and other forms of qualitative data. [http://www.atlasti.com/students.html](http://www.atlasti.com/students.html)

If you are interested in securing one of these licenses for your research use, please submit this form to the CCEI office on the Boca campus. Note that you need the signature of a supervising faculty member from CCEI in order to qualify for the license free of charge. We are especially interested in funding research that includes undergraduate students. This offer will remain only until all software licenses have been awarded, so do not delay. Please submit this form to the CCEI office.

Name: ______________________
FAU email: ____________________
Degree Program: ______________________

What research courses have you taken, if any, at FAU? *(Provide Course Prefix and Number – i.e., EDG 7944)*

Have you had experience with ATLAS.ti before? Y N

Have you had experience with other qualitative analysis software? *(Explain)* Y N

*Describe the research questions and proposed or ongoing study in which you will use ATLAS.ti to analyze data.*

*Explain how you will use ATLAS.ti to analyze your data.*

*Please provide the timeline for your study.*
