FAU Communication Disorders Clinic - Department of Communication Sciences and Disorders

Client’s Initials: Case # Date:
Clinician: Supervisor:

Were stated goals achieved?

If not, state the source(s) of difficulty and describe the nature of the problem (Possible problem areas: Goals–type or level; Procedures–problem with method and/or materials, with type of schedule of reinforcement, with allocation of time, with client/clinician communication, with client interest or motivation, session plan–type or application).

If goals were achieved, and in your opinion, the session went well, elaborate; (ALL sessions must be analyzed, not just problematic ones).

For each source of difficulty listed in the previous section, describe ways in which that problem might be resolved in future sessions (e.g. modification of clinician’s input, modification of client’s responses).
