

## Independent Toileting

Initiation is targeted once your child is schedule trained and has not had accidents for a week or so.

- 🍏 Fade the bathroom schedule to 45-60 min.
- 🍏 Continue with dry pants checks.
- 🍏 When bringing to the bathroom, stay behind and out of the student's sight.
- 🍏 Once in the bathroom, begin to move slowly (over days) to the door. Try not to help, unless it is a skill they are still learning.
- 🍏 Once you are out of the bathroom, continue to move away from the bathroom.
- 🍏 Handle accidents as before.
